PROFESSIONAL SUMMARY

PHP Full Stack Developer with 5+ years of software development experience building and maintaining web applications, APIs, and business-oriented systems. Strong backend experience with PHP and Laravel, complemented by professional experience with React, JavaScript, REST APIs, and GraphQL. Experienced in custom module development, payment and third-party service integrations, incident resolution, debugging, and maintaining existing codebases. Hands-on experience with MySQL, PostgreSQL, Git, Docker, Azure DevOps, and Jenkins. Currently working with Laravel 13 and modern API development practices.

PROFESSIONAL EXPERIENCE

Independent Software Developer / Freelance

Independent · Colombia · July 2026 - Present

- Develop personal projects focused on backend systems, REST APIs, and web applications, applying software architecture, security, version control, and testing practices.
- Build applications with native PHP, Laravel, MySQL, and PostgreSQL, with projects documented and version-controlled on GitHub.
- Implement authentication, authorization, business rules, relational persistence, and automated tests according to each application's requirements.
- Apply software development best practices, separation of concerns, debugging, and continuous code improvement.

PHP Backend Developer

COGNOX SAS · Medellín, Colombia · May 2022 - July 2023

- Developed and maintained modules for the SimplifICA platform using PHP, Laravel 8, React, and GraphQL, including company registration and query processes.
- Designed and implemented a complete PSE payment module for multiple invoices, integrating business logic and payment workflows.
- Developed backend functionality and integrations with user interface components and GraphQL services.
- Analyzed and resolved incidents and bugs reported by clients or support teams, documenting root causes and implemented solutions.
- Worked daily with Git and Azure DevOps for tasks, repositories, branching, and collaboration; participated in CI/CD with Jenkins and used Docker locally.

Technologies: PHP · Laravel 8 · React · JavaScript · GraphQL · SQL · Git · Azure DevOps · Jenkins · CI/CD · Docker

Project Professional / PHP Developer

GX7 INNOVATION SAS · Cali, Colombia · April 2021 - May 2022

- Designed and developed a payment history module with advanced filters by entity, year, month, and transaction type using PHP, Laravel 7, PostgreSQL, and SQL.
- Developed responsive data visualizations with JavaScript and Chart.js.
- Built an Excel file upload and processing module with preview and validation before persistence.
- Worked with relational data structures and SQL queries for business-oriented applications.
- Performed functional testing, application maintenance, Git-based version control, and technical incident resolution.

Technologies: PHP · Laravel 7 · JavaScript · PostgreSQL · SQL · Chart.js · Excel processing · Git

PROFESSIONAL EXPERIENCE (CONT.)

PHP Web Developer

ELON SAS · Valledupar, Colombia · July 2019 - January 2021

- Designed and developed a complete web platform for laboratory equipment lending and management using native PHP and JavaScript.
- Developed backend functionality and relational data persistence with PHP and MySQL.
- Implemented asynchronous client-server communication using AJAX and JSON.
- Built responsive interfaces with HTML5, CSS3, and Bootstrap.
- Independently handled development, maintenance, and end-to-end implementation of application features.

Technologies: PHP · JavaScript · AJAX · JSON · MySQL · HTML5 · CSS3 · Bootstrap

SELECTED PROJECTS

AppBank | Native PHP · MySQL · Docker

Digital banking simulation built with native PHP. Includes authentication, account management, registered beneficiary accounts, transfers, and transaction history. Implements MVC architecture, a custom router, middleware, a custom dependency injection container, CSRF protection, and business rules for financial operations.

StockCore | Laravel 13 · PostgreSQL · REST API

REST API for inventory and commercial operations management. Includes products, categories, suppliers, customers, inventory, stock movements, and orders. Implements authentication, roles and permissions, authorization, transactions, concurrency control, validation, and automated testing.

ZendTicket | Laravel 13 · Blade · Tailwind CSS · MySQL

Web-based ticket management system with authentication, roles and permissions, departments, categories, priorities, agent assignment, status workflow, and activity traceability. Includes password recovery, protection against repeated login attempts, and automated testing with Pest.

TECHNICAL SKILLS

Backend: PHP · Laravel 7-13 · REST APIs · GraphQL · MVC · OOP · Composer

Frontend: React · JavaScript · TypeScript · HTML5 · CSS3 · Bootstrap · AJAX · JSON

Databases: PostgreSQL · MySQL · SQL · Relational database design · Query optimization

APIs & Web Development: RESTful API design · API integration · GraphQL · Authentication · Web application development

DevOps & Tools: Git · GitHub · Docker · Azure DevOps · Jenkins · CI/CD

Development Practices: Git Branching · Code Review · Debugging · Maintenance · Agile/Scrum · Technical incident resolution

EDUCATION

Electronic Engineer - Universidad Popular del Cesar · Valledupar, Colombia · August 2010 - August 2018

LANGUAGES

Spanish: Native · English: Intermediate (B1)
